What are the practices and/or behaviors that you would like this instructor to START exhibiting or displaying (things he or she is not currently doing)?

Comments
Giving feedback on all of our case studies
I feel some of the rubrics for the assignments are not pairing correctly with that assignment. For example, the final project is a power point presentation, yet on part of the rubric talked about word length instead of time. Would recommend reviewing rubrics towards the assignments.
Professor Yan is great and demands excellence. He could aid more in facilitating the groups and individuals zoom calls he request for a class grade as many of my classmates were seemingly unavailable.

The material for this course was very heavy. For how short this semester was– unless I missed it– a fair warning of the course load to working students would be very helpful.
I thought Professor Yan did great!

What are the practices and/or behaviors that you would like this instructor to STOP exhibiting or displaying (things he or she should stop doing)?

Comments
Nothing, great job
The group/individual groups part was very confusing from the start of course to the end. I would recommend just having students get into groups of 3-5 students and remove the individual group aspect completely. This will go hand and hand with the lesson of time management more.
Stop requiring group work for a online class.
I would prefer to not have to meet with classmates for a video call as many of us work and scheduling can be difficult.

If there is a way to shorten the reading material, or even make some of it optional during a summer session, that would be nice. Over all the materials provided were relative and enriching.

What are the practices and/or behaviors that you would like this instructor to CONTINUE to exhibit or display (things he or she already does)?

Comments
Being awesome
I felt this instructor gave great constructive feedback and was always attentive and positive. Really appreciated that form of support in an online classroom setting.
Professor Yan should continue pushing his student with his excellent feedback and intentional words to increase output in his students.
This instructor was phenomenal, the course was laid out perfectly. All assignments were clear in what needed to be done. The feedback was not a one word sentence, they provided actual feedback and told me why I missed a point or two. It feels like they care about my learning and I hope they continue teaching this course for other students to have a good experience.
Keep being engaged with announcements.
He seemed very present with the class. He posted regular announcements and responded to emails fast
the weekly case studies
Continue the case studies. It was challenging ,and posed a a great way to force students to think critically in real life scenarios while applying what was being taught.
Class format was excellent
Expectations for assignments were clear and detailed.
frequent course announcements are nice

Do you have any suggestions for how to improve this course?

Comments
Get rid of group work
Please do groups only and not individuals pairings. That was confusing. Also reading through the rubric to match better to the assignments a bit. Other than that, this was a fun and interesting course.
None.

Reducing the number of case studies
It was really difficult to complete the zoom discussion with another classmate. The reason I take online is due to my busy schedule and I didn't have the time to complete the discussion with another person.
no
The reading material inside of the actual book provided had some issues throughout the course. Improving that feature would have made this course easier.
